CS3933 Assignment 5
Summer 2007

Due: Thursday, June 7, in class or by 10:00am in the box on E-level, (but remember to try them before Tuesday).

- Read chapter 4, sections 4, 5 and 6.
- From chapter 1, do question 6 on page 25. Reduce to the stable marriage problem.
- From chapter 3, do question 10, page 110.
- From chapter 4, do questions 4 (page 190) and 13 (page 194). Explaining your algorithm in English is a sufficient answer for the text's question, but I would like you to also give a proof that your algorithm gives a best answer.
