CS3933 Assignment 4
Summer 2007

Due: Thursday, May 31, in class or by 10:00am in the box on E-level, (but remember to try them before Tuesday).

- Read Chapter 4, sections 1, 2 and 3.
- From chapter 2, do question 3 on page 67. Everybody should get this. I only want a list of the functions in order.
- From chapter 3, do questions 1, 6 and 12, pages 107-112.
- From chapter 4, do question 5 on page 190. Explaining your algorithm in English is a sufficient answer for the text's question, but I would like you to also give a proof that your algorithm gives a best answer.
